Research Scientist,

Central Research laboratory and Dept of Microbiology,

Aarupadai Veedu Medical College, Pondicherry.

TESTIMONIAL

Respected organising committee of **ILBS-ECHO PROJECT**, I am hereby privileged to thank all the organising members of the programme for conducting it in a much disciplined manner. The course material such as slides, research updates, answer for the queries raised and finally the case reports which are discussed are very informative. The classes enlightens us with current advancement in the field of Hepatitis, its current scenario, diagnostic options, treatment procedures to all classes of medical professionals such as treating clinicians, pharmacologist, gastroenterologist, pathologist, community medicine faculties and finally to the laboratory personnel. Reminder for classes that are sent 2 days ahead make our faculties to make their schedule free to attend the class on time without fail. The provision for attending the telemedicine class even from home during off duty days are much encouraged by all. The course slides are also available for future reference is much appreciable. As a organising staff of AVMC & H I thank ILBS- ECHO Project committee members for their noble work and for this wonderful opportunity given to us.....
