

## TESTIMONIAL

On behalf of Jaipur National University Institute for Medical Sciences and Research Centre, I want to express my appreciation for a very finely run ILBS ECHO Project.

Different case discussions during conference sessions gives a wide range of knowledge to our physicians to deliver best - practice care for complex health conditions in underserved areas where this specialty was previously unavailable making our patients and front line health professionals the true architects for the success of JNU.

You have a difficult job, but a rewarding one as this project helps in thinning a vast gap between semi urban and rural areas which is the major agenda of our Institute as well.

JNU IMSRC looks forward to be a part of your future projects too

With all the best wishes

Dr. Jaswant Goyal, MD

Advisor (Medical Sciences)

Jaipur National University

Institute for Medical Sciences and Research Centre

Jagatpura, Jaipur.
